

CORPORATE UPDATE

March 2014

Dear Shareholders,

With operations underway at the Omai project, I thought you may be interested in viewing a sample of the typical refined gold that we, and our joint venture partner, sell to the gold board.

This particular sampling is approximately 25 ounces. Please note that reporting of gold production will begin in our quarterly disclosures.

As with any new operation, we continue to work through start up issues. The team is learning the operation, maintenance, and sampling routines necessary to run efficiently and with good operating availability. We are working toward putting on more mining teams in an effort to fully utilize the equipment.
